Global sourcing. Built around your ambition.

22 sourcing options. Three business pathways.

Starter Deals • Business-in-a-Box • Equipment & Infrastructure
Including a dedicated Heavy Machinery & Mining range.

Explore products, business packages and equipment. Build your shortlist and request a quotation tailored to your requirements.

Choose the next step for your business.

MR stands for Mague & Rachy. Based in Harare, our sourcing focus includes China, Turkey and Bangladesh. We help turn product, business and equipment requirements into a clear sourcing brief.

01

Starter Deals

Resale stock and everyday essentials. Define the customer, product assortment, quantities and packaging before comparing quotations.

02

Business-in-a-Box

Proposed equipment lists for bakery, salon, barbershop, tailoring and personalisation businesses. Plan the full setup, including space and utilities.

03

Equipment & Infrastructure

Commercial machines and infrastructure, with a dedicated machinery and mining range covering earthmoving, haulage, drilling, processing, site utilities and spares.

How to use this catalogue

Choose a sourcing family, review its planning checklist and send your intended application, quantity, specifications, budget and destination. Reference images help identify a product or replacement part. Use the website for the expanded offer details and package-planning guides.

All component lists and quantities are planning examples. Your approved quotation defines what is included and what you need to arrange separately.

Starter Deals

Clothing resale starter bundle

Everyday clothing for a small retail venture.

POSSIBLE SOURCING SCOPE

- Power demand: Electrical load, starting loads and working duty
- Compressed air: Required pressure, flow and connected equipment
- Water handling: Flow, total head, water quality and solids

View details & prepare an enquiry →

Heavy Machinery & Mining

Machinery spares & wear parts

Find replacement parts through a clear identification brief.

POSSIBLE SOURCING SCOPE

- Filters, belts, seals and hydraulic components
- Undercarriage components, bucket teeth and attachments
- Crusher jaw plates, liners and other specified wear parts

SPECIFICATIONS TO CONFIRM

- Machine identity: Make, exact model and serial number
- Part identity: Part number, photographs and key dimensions
- Compatibility: Fit, material and specified replacement type

View details & prepare an enquiry →

Your requirements shape the quotation.

Bring the details that help compare suitable options.

- Intended application and working conditions
- Required quantity, capacity or business setup
- Power, water, fuel and available space
- Budget and delivery destination
- Reference photographs, model numbers or supplier links
- Installation, inspection, servicing and spares requirements

Support around your sourcing enquiry.

Product sourcing

Help customers turn a product idea, reference photograph or supplier link into a sourcing brief..

Supplier identification and quotation comparison

Compare potential suppliers, specifications and quotations against the customer's requirements.

Samples and pre-shipment checks

Coordinate samples and agreed checks through suppliers or inspection providers, where available.

Business package planning

Build a proposed equipment-and-stock list around the customer's business type, budget and operating requirements..

Bulk purchasing and repeat orders

Coordinate agreed procurement quantities and repeat-order requirements after the customer approves the quotation..

Shipment consolidation and freight coordination

Arrange consolidation and freight liaison through agreed logistics providers.

Landed-cost quotation support

Help customers understand quoted product, freight and other stated costs.

Delivery and after-sales coordination

Coordinate agreed collection or delivery and relay supplier warranty or spare-parts enquiries.

Heavy machinery & mining sourcing

Project-led sourcing enquiries for earthmoving, haulage, drilling, processing and site-support equipment.

Confirm the exact service, provider, cost and responsibilities in your quotation. Explore all 18 services and the enquiry checklists on the website.

Support around your sourcing enquiry.

Fleet & multi-machine procurement

Coordinate an equipment list for a project, from individual machines to compatible attachments and site-support equipment.

Spare parts & consumables matching

Prepare replacement-part enquiries using model plates, part numbers, measurements and photographs.

Used machinery sourcing support

Help structure enquiries for used equipment, including operating hours, service history, working video and an agreed inspection scope.

Private label & custom packaging

Coordinate enquiries for customer branding, labels, printed packaging and product customisation where a supplier offers them.

Equipment replacement & expansion planning

Build a sourcing list around a replacement machine, extra production capacity or an additional business location.

Export packing & loading coordination

Liaise on agreed protective packing, carton or crate specifications, packing lists and loading evidence.

Freight documentation liaison

Help collect agreed supplier invoices, packing lists, technical details and other documents requested by the appointed freight or clearing provider.

Installation & commissioning liaison

Coordinate questions and arrangements between the buyer, supplier and any appointed installer.

Manuals & supplier training coordination

Request available operating manuals, maintenance schedules, supplier demonstrations or training options for the quoted equipment.

Confirm the exact service, provider, cost and responsibilities in your quotation. Explore all 18 services and the enquiry checklists on the website.

Make the next decision a clearer one.

Find your business

Match your interests, space and utilities to relevant business ideas. Suggestions are planning prompts, not income or affordability promises.

Explore on the website →

Compare manufacturer references

Review nine specific official manufacturer examples. Current supplier approval, exact models, regional suitability, price and support need confirmation.

Explore on the website →

Costs & delivery

Use the cost worksheet and packing-volume calculator. Separate goods, sourcing, checks, freight, clearance and setup; blank figures remain unknown.

Explore on the website →

Supplier checks & support

Agree check scope and evidence, installation, warranty responsibility and spare-parts requirements before ordering.

Explore on the website →

Your enquiry record

A reference is confirmed only after saving. Keep your private link to see customer updates and documents explicitly shared by the team.

People & sourcing regions

Meet Mague & Rachy, find the Harare contact details, and prepare a useful sourcing brief for China, Turkey or Bangladesh.

Explore on the website →

No standard freight rate, customs figure, universal delivery time or guaranteed earnings are implied. The agreed quotation defines the order and responsibilities. Private progress links should be shared only with authorised people.

Start with a clear sourcing brief.

Include these details

- The product, machine or business package you need
- Intended use, material and required quantity or capacity
- Site information, utilities, dimensions and access
- New or used preference where relevant
- Indicative budget and delivery destination
- Reference images, model plates, part numbers or links

Before agreeing to an order

Review exact specifications, quantities, inclusions, price, freight and other stated costs. Confirm timing, payment arrangements, delivery responsibilities, warranty, installation and support. A website enquiry is not a confirmed order.
